CALL FOR APPLICATION FOR A RESEARCH SCHOLARSHIP

Ref^o: FEP_HNL_BI-1

[Portuguese version](#)

A call for tenders is now open for the attribution of one Research Scholarship within the scope of the Project “Applied Neuroscience: Design and Implementation of Behavioral Paradigms”, under the following conditions, set out below.

Scientific area: Psychology, Neurosciences.

Admission requirements:

General requirements:

Candidates for the Research grant must hold a Master in Psychology, Neurosciences or related areas.

Specific requirements:

- Previous training or experience in cognitive and affective neuroscience;
- Familiarity with research methodologies in the field of applied neuroscience;
- Experience with animal models;
- Experience in the design and implementation of behavioral experimental paradigms;
- Experience in data processing and analysis, including physiological signals and advanced statistical modeling;
- Proficiency in the use of research and data analysis tools (e.g., PsychoPy, MATLAB, R, Python, SPSS);
- Proficiency in English (written and spoken);
- Ability to work collaboratively in interdisciplinary contexts;
- Previous experience in the design and development of research projects;
- Strong organizational, time management, and attention-to-detail skills;
- Availability to participate in science dissemination activities.

Preferred Factors:

Will be considered preferred factors:

- Postgraduate training in Neuroscience;
- Training in Neurophysiology and Methodologies.

Candidates for the Research scholarship must also be enrolled or commit to enrolling in a course that does not lead to an academic degree that promotes the consolidation of their scientific training¹.

Work Plan:

To achieve the project objectives within the scope of research grants, the following activities will be carried out:

The activities to be carried out aim to develop technical and scientific competencies in the field of human neurobehavior through direct support for the implementation of R&D projects at the Human Neurobehavioral Laboratory (HNL). The focus will be on the optimization of experimental protocols and the assurance of methodological rigor in scientific production. The research fellow is expected to develop technical autonomy, contributing to the methodological robustness of ongoing studies and to the strengthening of the laboratory's scientific output indicators, through the following activities:

- a. Development and technical configuration of experimental paradigms, ensuring the correct operationalization of variables and the calibration of neurobehavioral data collection instruments.
- b. Scientific management of databases (data curation) and technical preparation of documentation for ethics committees, ensuring compliance with data protection protocols and research integrity standards.
- c. Definition of recruitment strategies and conduction of experimental sessions, ensuring the rigorous application of research protocols and quality control during the data acquisition phase.
- d. Active participation in scientific seminars and discussion routines at HNL, collaborating in the preparation of scientific communications and in initiatives aimed at disseminating results to the community.

¹ Candidates are given the possibility, at the application stage, to submit only a declaration of commitment to enroll in a course that does not confer an academic degree under the terms mentioned above. If the candidate is selected, the delivery failure of the effective enrollment document for the course, within ten working days, following the date of communication of the selection, will be considered as withdrawal of the candidate for the scholarship investigation for which you were selected
